FACTS ABOUT DANKOST PRO

GENERAL	THE BUSINESS
The software uses your data and ingredients . By request it can be provided with your local standard database of ingredients	The company has been in the business for 25 years
Real time calculation of nutrition, vitamins, acids polyoler, price etc.	Well known in Denmark, Iceland , Faroe Island and Greenland
Unlimited number of ingredients and products / recipes – import through CSV files	The company was acquired by Kraftvaerk Group A/S summer 2016 – Danish IT-company. Global 150 employees
Nutrition is aggregated in case several products are packed together in the same box (ex. 6 pcs of different chocolate)	Our customers are food manufactures and institutional kitchens in Denmark (<i>currently</i>)
Detailed declaration in the above scenario. Each pcs can have its own full or partly declaration (ex. just showing allergens)	At our office in central Copenhagen, we have our hotline team ready to support you. The team have a background within the food industry and has deep knowledge in the application
Declarations in up to 6 different languages by customer choice at the same recipe	Globally we have approx. 100 customers within food manufacturing and approx. 50 institutional kitchens. Size varies, but from small companies to companies on the stock market
Products that are manufactured for another final product, can be created as subrecipe (ex. a dough). This minimizes the time used for data maintenance. The dough will only have to be updated once even though it is being used in multiple products. We call it “product in product”	References eg. Sláturfélag Suðurlands – for further references, please contact us.
Product development – create a copy and adjust ingredients or add new to get a new or better performing product	
Design your own labels , data sheets, PR material etc. The software comes with various templates with dynamic fields so it is easy to make your own designs	Contact info: + 45 40 70 24 90 info@dankost.dk
Pictures at the recipe available on datasheets and specifications	
Declaration according to EU legislation . You can adjust the declaration / label freely. Show QUID, allergens, additives as number or text, ecology, CO2 / environmental impact	

FURTHER INFORMATION	PRICES
The software comes in English but can be provided in Danish, Swedish and Norwegian. Further languages can be added by request	Prices start at 3,400 EUR
Service and maintenance subscription: Free hotline and up to two application updates yearly. The last release was in November 2018	A medium size solution with a couple of concurrent users cost around 5,000 to 7,500 EUR
All data in the software is located in database on your SQL Server . Access is fully controlled by your organization. Number of users can be unlimited	Service and hotline subscription (not mandatory) start at 600 EUR (yearly)
